AMERICAN LEGISLATIVE EXCHANGE COUNCIL

Exposed

By the Center for Media and Democracy
www.prwatch.org

DID YOU KNOW? Corporations VOTED to adopt this. Through ALEC, global companies work as "equals" in "unison" with politicians to write laws to govern your life. Big Business has "a VOICE and a VOTE," according to newly exposed documents. **DO YOU?**

Resolution to Repeal Section 526

WHEREAS, Section 526 attempts to prohibit agencies of the government of the United States from purchasing transportation fuels that are derived from alternative or synthetic fuels, including fuels produced from nonconventional petroleum sources; and

WHEREAS, the U.S. military and federal government agencies would face an immense challenge in addressing Section 526, due to the total impracticality and lack of means for determining the original sources of the fuels they purchase; and

WHEREAS, such a prohibition would decrease supply of fuels from domestic and North American sources; and

WHEREAS, energy demand is increasing and America's energy security depends on access to reliable, safe and trusted supply sources; and

WHEREAS, fuels derived from coal-to-liquids, oil shale and oil sands are all potentially abundant in the United States and Canada; and

WHEREAS, the U.S. military, now engaged in two wars, is the largest single purchaser of transportation fuels in the country; and

WHEREAS, American jobs and economic growth are tied directly to past, current and future investment in the development of new sources of domestic and North American energy, including oil sands and coal-to-liquid technologies; and

WHEREAS, Section 526 contradicts and conflicts with Section 369 of the Energy Policy Act of 2005, a more comprehensive law which directs the U.S. Department of Defense to support an energy development program with Canada; and

WHEREAS, Canada is by far the largest foreign supplier of energy to the United States; and

WHEREAS, the North American Free Trade Act prohibits discrimination against the products of Canada by the United States.

THEREFORE, BE IT RESOLVED, by the American Legislative Exchange Council, that Section 526 of the "Energy Independence and Security Act of 2007" should be repealed.

From CMD: Section 526 of the Energy Independence and Security Act prohibits federal agencies from using "dirty fuel" that produces more greenhouse gases than conventional fuel, such as fuel obtained from the Alberta tar sands, which is causing devastating consequences to that region.

ALEC EXPOSED

"ALEC" has long been a secretive collaboration between Big Business and "conservative" politicians. Behind closed doors, they ghostwrite "model" bills to be introduced in state capitols across the country. This agenda-underwritten by global corporations--includes major tax loopholes for big industries and the super rich, proposals to offshore U.S. jobs and gut minimum wage, and efforts to weaken public health, safety, and environmental protections. Although many of these bills have become law, until now, their origin has been largely unknown. With **ALEC EXPOSED**, the Center for Media and Democracy hopes more Americans will study the bills to understand the depth and breadth of how big corporations are changing the legal rules and undermining democracy across the nation.
